

Knowledge Beyond Measure.

# TSI AccuBalance® Capture Hood 8380-B

This is designed to target HVAC professionals in need of an accurate and durable capture hood.

- Allows for selling only the accessories the customers may need for their business
- The included calibration certificate is a key differentiator at this price point
- The 8380-B does not include the standard accessories that are included with the 8380

**The following shows how the 8380-B is positioned in relation to our normal product offerings and what is included:**
