

## **YESAIR 8-Channel IAQ Monitor**

The YESAIR is a battery powered, portable air quality detection and data logging instrument designed for intermittent or continuous indoor air quality monitoring.

It is available in two models (Pump or Diffusion). Each can be configured as a multi-channel operation, with a selection of more than 30 different plug and play gas sensors, including a particulate sensor and an optional huge capacity data logging SD memory card. Both models come with one temperature sensor, one relative humidity (RH) sensor, the capacity for 5 internal gas sensors consisting of a maximum of three electrochemical toxic gas or oxygen sensors plus two high current draw sensors such as an infrared, PID, catalytic or particulate sensor.

Sensor readings, battery level and data logging status can be viewed live on the multi-line, backlit, LCD display. The optional YES Viewer Logger package offers a 2 GB SD memory card with card reader, a USB cable and YES Viewer software. The card reader can be used to store or transfer data. Alternatively, data can be downloaded to a computer using the mini USB connection. The YES Viewer software allows users to analyze and graph data.

An optional sampling probe is available with the Pump model. The probe has a 10 inch wand and 30 inches of tubing that fits onto the nozzle and allows you to reach into areas that are difficult to access.

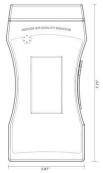

## **KEY FEATURES**

- » Capacity for 1 temperature sensor, 1 RH sensor, 5 internal gas sensors and 1 particulate sensor
- » More than 30 plug & play sensors available to choose from, including electrochemical, catalytic, infrared, PID, particulate
- » Multi-function, easy to use menu
- » Light weight, contoured & comfortable to hold
- » LCD displays readings for all sensors, battery level and logging status
- » Sampling with an internal sample draw pump or by diffusion
- » High capacity data logging with 2GB SD memory card
- » Data logging software for collecting, analyzing and graphing data
- » RoHS compliant circuit boards
- » CE certified

## **APPLICATIONS**

- » Residential Buildings
- » Commercial Buildings
- » Schools
- » Retirement Homes
- » Sports Facilities
- » Hospitals
- » Airports»
- » Research Facilities
- » ... and many more where indoor air quality is a concern

### **TECHNICAL DRAWING**

shown without the particulate sensor or antenna

| PNP-Z+        | TVOCs (PID), 0 - 30 ppm                                                             |
| CET-PM2.5     | Particulates 2.5 µg/m3                                                              |
| CET-PM10      | Particulates 10 µg/m3                                                               |

### **ACCESSORIES**

| CET-8000-CKFT   | Standard yellow gas flow tubing for calibration, 2 ft, 3/16" ID / 5/16" OD, priced per foot                                  |
|-----------------|------------------------------------------------------------------------------------------------------------------------------|
| CET-8000-CTFT   | Teflon lined gas flow tubing for calibrating sticky gases, special non-absorbent, 2 ft, 3/16" ID / 5/16" OD, priced per foot |
| REG-ADAPTER     | Brass fitting that threads onto regula-<br>tor to accommodate 15 and 17 litre<br>cylinders                                   |
| YES-AIR LGR PKG | YES Logger package with 2 GB memory<br>card, card reader, USB cable, YES Viewer<br>Software                                  |
| YES-HHPROBE-10  | Handheld 10" probe with 30" of sample hose                                                                                   |
| YES-SFTWR       | YES Viewer data logging software (USB drive)                                                                                 |

Do you have a YES DUST? Upgrade your YESAIR to the particulate sensor that replaces the YESDUST. Units must be returned to the factory for retrofitting. p/n: CET-DUST-RETRO
