

® Knowledge Beyond Measure.

# Durable, Reliable Ventilation Testing. Made for Professionals Like You.

## VelociCalc® and VelociCalc® Pro Multi-Function Ventilation Meters **9600 Series**

The new VelociCalc® Multi-Function Ventilation Meters, the next generation of our tried and trusted instruments for industry professionals, are designed to accurately and reliably measure a wide variety of parameters important for maintaining healthy indoor environments. The 9600 Series uses guided workflows programmed for professionals to reliably and repeatably simplify complex decision making.

### Ready, Set, Test!

- No manual work - calculations are done by the instrument on the spot
- New guided built-in process workflows for standard jobs
  - heat flow calculations
  - % of outdoor air
  - duct traverse grid measurements
- Programmable soft keys allowing for quick access to functions specific to your application
- Customizable dashboard
- Modern user interface with intuitive menu
- High-resolution color screen displays multiple measurements simultaneously and in real-time
- In-field calibration and firmware updates
- Multi-language

### Versatile

- Multiple application measurements with plug-and-play probes
- On the spot, printable data project reports
- Hands-free operation via probe holder and integrated magnets

### Rugged and Reliable

- Over-molded surround protects the instrument from accidental bumps and drops
- Menu keypad made for harsh environments
- Wrist strap for additional drop protection
- Protected differential pressure ports

### Unrivaled Performance and Service

- High performance and accuracy
- Fast turnaround calibration and repair service with exceptional customer support
- Accredited ISO 17025

### Applications

- HVAC commissioning, testing and balancing
- Acceptance testing
- IAQ investigations
- Research studies
- Clean room testing
- Biological safety cabinet and laboratory fume hood testing
- Thermal comfort studies
- Validation and Certification
- Facility Management
