ANALOG OR DIGITAL GAS DETECTORS DATASHEET
CGAS DETECTOR for Indoor Public Spaces

FIXED SYSTEMS

Designed for use in publicly occupied and frequented spaces. Ideal for use where integrated demand controlled ventilation (DCV) is used to regulate a comfortable working environment, maintain air quality and promote energy savings. The low profile, aesthetically pleasing enclosure is designed to reduce the noticeability of the device by the public eye.

Both the analog and digital models are powered by 24 VDC or ground referenced AC, come with an LCD display, temperature compensation and thermal resetting fuse. Sensor replacement is easy with true Plug & Play smart sensors that arrive pre-calibrated. The firmware and configuration can be upgraded in the field using the USB connection.

The digital models are user configurable in the field for BACnet® MS-TP RS-485 or Modbus® RTU RS-485 output for communicating with a controller, Building Automation System or other control panel.
