Compressed Air Brochure

Measuring small changes can add to
immeasurable results

Measuring small changes can add to immeasurable results

When dealing with compressed air, measuring small changes in dew point temperature can really make a difference. The benefit from our unique DRYCAP® sensor technology covers the full dew point range for practically any compressed air system. Increasing the life of your compressed air system, improving process quality and lowering costs is now easier than ever.

Vaisala instruments can accurately measure every quality class of compressed air

Whatever your application, you'll find the optimal dew point instrument from the Vaisala portfolio. All Vaisala sensors withstand exposure to contaminants like water spikes, ambient humidity, compressor oil and chemical impurities.

Optimal measurement range for each product

Vaisala DRYCAP® sensor

- excellent accuracy and stability
- high chemical tolerance
- sensor purge and warming
- fast response time (avg. dry-to-wet 5 s / wet-to-dry 45 s)

01

Material savings through quick reaction time

Vaisala dew point measurement products have some of the fastest wet-to-dry and dry-to-wet response times in the market. You can spot changes in production conditions immediately and avoid wasting materials and production time.

02

Energy savings through continuous measurement stability

You can rely on Vaisala's patented auto-calibration function to maintain the measurement stability and keep the production conditions optimized.

03

Cost savings through accurate measurement

Vaisala's dew point measurement products help you optimize the moisture levels of your production process, and to prevent unwanted developments such as corrosion of equipment or growth of bacteria. This will help to ensure high-quality compressed air and first-class end-products.

Indigo-compatible probes

DMP7

dewpoint and temperature probe for remote installations in tight spaces

- For remote installations in tight spaces
- Superior chemical resistance
- Pressure up to 10 bar
- Modbus RTU over RS-485 for flexible connectivity
- Compatible with Indigo Series transmitters
- DRYCAP® sensor technology
- Thread adapters and other accessories available

DMP8

dewpoint and temperature probe with adjustable installation depth for pressurized pipelines <40 bars

- Adjustable installation depth
- Pressure up to 40 bar
- Compatible with Indigo Series transmitters
- DRYCAP® sensor technology
- BALLVALVE-1 Ball Valve set
- Thread adapters and other accessories available

DMP80

for spot-checking and calibrating dew point measurements

- Optimized for portable measurements with integrated handle design for direct process measurements.
- IP66-classified for protection against moisture and dust.
- Superior stability ensured by sensor warming to prevent condensation.
- Measurement range:
 - A variant: -40 ... +60 °C Td/f
 - B variant: -70 ... +60 °C Td/f.
- Compatible with Indigo80 and Insight PC software.

The Vaisala Indigo family is a customizable instrument platform designed to improve process measurements.

The Indigo family's key feature is modularity. It contains a selection of transmitters, interchangeable smart probes that measure various parameters, and software for easy interfacing and monitoring of data.

» Read more about the Indigo ecosystem and the interchangeable measurement probes.

Compact probes for original equipment manufacturers and sampling cells

DMT132

dewpoint transmitter for refrigerant dryers

Affordable, yet highly accurate: $\pm 1^\circ\text{C}$ ($\pm 1.8^\circ\text{F}$) in refrigerant dryer measurement range
Excellent long-term stability – resistant to compressor oil
Low powered, 10 ... 28 VDC
Pressure up to 20 bar
HUMICAP® sensor technology

DMT152

dewpoint transmitter for very dry applications

Measurement range down to -80°C (-112°F)
Pressure up to 50 bar
DRYCAP® sensor technology

MINIATURE DMT143 & DMT143L (LONG)

dewpoint transmitters for industrial dryers and tight spaces

Small size for compact industrial dryer applications
Stable and cost-efficient
LED alarm for exceeded dew point level
DMT143: pressure up to 50 bar
DMT143L: pressure up to 20 bar
DRYCAP® sensor technology
DMT143 is compatible with the Indigo80 for spot checking and calibration without removing the probe from the process

SAMPLING CELLS

[Learn more about sampling cells](#)

DMT242SC ISO threaded sample cell
SC-025NPT NPT threaded sample cell
DMT242SC2 sample cell with swagelok 1/4" male connectors
DSC74 sample cell with quick connector and leak screw
DSC74B Two-pressure sampling cell
DSC74C Two-pressure sampling cell with coil

Indigo series transmitters

INDIGO500

series transmitters for easy data evaluation and visualization

- Color touch screen display
- 2-4 analog outputs (mA/Vdc selectable)
- 2x relays
- 24Vdc or 120Vac power options
- Data logging
- Ethernet port, web user interface, Modbus TCP/IP

INDIGO300

series transmitters for analog outputs and visualization

- Color display
- IP65 metal housing
- 24 V AC/DC power supply input
- 3 pre-configured analog outputs (mA or V)
- Service port on the front

INDIGO200

series transmitters for analog outputs and visualization

- 1 interchangeable probe connection (direct or with extension cable)
- Up to 3 parameters can be shown
- Display or display-less version
- 3 analog outputs (mA/Vdc selectable)
- 2x relays
- 24Vdc Power

INDIGO80 HANDHELD

Handheld indicator for field sampling and calibration, data analysis and diagnostics

- Wide dew point measurement range
- Dual-probe, high-accuracy portable diagnostics and data logging tool
- Industry standard USB-C interface
- Interactive multilingual menu-based user interface
- Compatible with all Indigo-compatible probes and transmitters, including DMP80 and HMP80 handheld probes and GMP80P probe with pump sampling.
