

Our Company

Excellent Measurement Solutions

Kenelec Scientific is one of Australasia's leading providers of measurement solutions for a wide range of industries including **occupational hygiene**, **environmental monitoring** and **scientific research**.

Strong relationships built with our customers, suppliers and other stakeholders during our **60+ years of business** are testament to the **expertise, multi-decade experience and reliability** of our team members.

Excellent Service

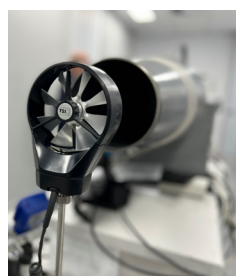

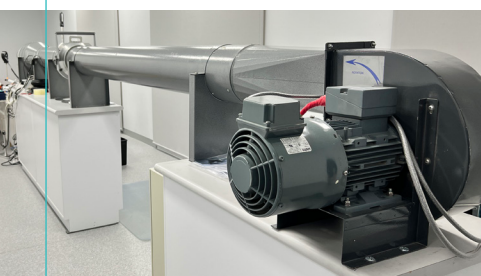

From our **specialised facilities** in Melbourne, and in cooperation with **extensive distribution networks**, we **globally source** and **locally support advanced technologies** for customers across Australasia and other parts of the Asia Pacific region.

Our full-service range includes:

- Sales
- Rental
- Calibration
- Validation
- Service and Repairs
- Product Education
- Financing
- Systems Integration

Excellent Quality Systems

Our **Quality Management System** is maintained in compliance with international standards and, where relevant, NATA requirements. We have held **ISO 9001** certification since 2003, and since 2008 our particle counter and vane anemometer calibration laboratories have been accredited to **ISO 17025**. In 2025, we further strengthened our capability with the addition of NATA-accredited flow meter calibration services.

Core Competencies

- Experienced technical sales engineers with in-depth product knowledge and a strong understanding of customers' needs
- Providers of both off-the-shelf equipment and custom monitoring systems tailored to specific requirements
- State-of-the-art laboratories offering a range of essential services including calibration, service and repairs conducted by highly experienced factory-trained technicians and qualified engineers
- Calibration and test equipment is traceable to NMI or equivalent international primary standards and ultimately to SI Units, in accordance with ILAC Policy P10
- Validation services to a range of industries
- Ongoing support of installed and existing environmental and cleanroom monitoring systems
- Design and development of monitoring systems, installation and commissioning

Differentiators

- Over 60 years experience with reputable strengths in Mining, Occupational Health and Safety, HVAC&R, Pharmaceutical and Environmental industries
- Over 45 years of representing TSI Incorporated in Australia and New Zealand; a globally recognised company at the forefront of instrumentation for environmental monitoring, particle analysis and other advanced scientific fields
- NATA-accredited to perform particle counter, vane anemometer and flow meter calibrations under the requirements of ISO 17025 (Accreditation No. 15814)
- Long standing affiliations with key areas of research, government, corporate and university sectors
- An established Rental department providing the latest instrumentation for a range of industries including pharmaceutical and cleanroom industry
- Research and Development successes in environmental monitoring and wireless monitoring capabilities

Past Performance

- **BHP Western Australia**
Mine Site Dust Monitoring
- **Bioproperties**
Vaccine development – FlowCam 8100
- **Christchurch Hospital**
Flow Analyzer
- **CSIRO**
Virus Aerosol research TSI Optical Particle Sizers
- **Department of Defence**
Particle Research Instruments
- **DCCEEW & EPA VIC / TAS / SA**
Dust Monitoring Program
- **Schneider**
Room Pressure Monitors
- **State Health Dept / Australia Federal Police / Royal Flying Doctor Service**
PortaCount Fit Testers
- **Sydney Children's Hospital Network**
EMS & Particle Counter System
- **Westmead Institute for Medical Research**
Particle & Microbial Monitoring System

Markets and Industries

Kenelec Scientific supports a variety of different markets and industries, with expertise in the following areas:

- Environmental Dust & Aerosol Monitoring
- Quantitative Respirator Fit Testing
- Flow Instruments
- FMS & Cleanroom Monitoring
- Hospital Monitoring
- HVAC&R & Indoor Air Quality Monitoring
- Laser Research
- Particle Research
- Pharmaceutical Research & Development
- Water & Process Monitoring
- Biodegradability & Sustainability
- Respirometry Instrumentation
- Diesel Particulate Matter & Silica Monitoring
- Smoke Monitoring

We look forward to
working with you.
